- Developed and deployed **UDealZone** cross-platform marketplace application using Next.js and React Native, delivering web and mobile experiences available on Google Play Store and Apple App Store.
- Built key features including product browsing, real-time chat, notifications, AI assistance and performance optimizations for a seamless user experience across platforms.

Projects

UDeal – Cross-Platform Marketplace Application (Web & Mobile) Website - Mobile

- Developed a cross-platform marketplace application for both web and mobile using Next-Js and React-Native. Built a cross-platform marketplace (web & mobile) with category-based, location-based and "nearby products" browsing.
- Developed real-time chat system connecting buyers and sellers, with AI-powered chat support for user assistance. Implemented notifications, offline support and a high-performance responsive UI for seamless shopping experience.

H&H Visa Consultant – Global Education Gateway Platform (Islamabad) Preview

- Developed and deployed an SEO-optimized, responsive consultancy website featuring study and visit visa services, university listings, destination exploration, consultancy booking, and leadership sections.
- Built conversion-focused pages using Next.js, Tailwind CSS, and Framer Motion to improve user experience, discoverability, and inquiry generation.

H&H CRM — Enterprise Lead Management & Operations System Preview

- Developed a production CRM system with role-based dashboards for sales, consultants, processing, accounting, reception, media, management, and executive administration.
- Implemented lead assignment and tracking, consultant workflows, walk-in client management, invoice generation, payment and balance tracking, and centralized operational reporting.
- Integrated MongoDB Atlas, Express.js APIs, and a scalable backend architecture, with automated lead synchronization connecting marketing campaigns to the CRM.

H&H Visa Eligibility Quiz — Interactive Lead Generation Platform Preview

- Built an interactive study and visit visa eligibility quiz that collects user inquiries, evaluates responses, and delivers personalized results via email using Brevo.
- Integrated the platform with the CRM to automatically capture campaign leads, streamline consultancy bookings, and connect social media marketing with the sales pipeline.

PitchDeck – AI-Powered Career Launchpad for Students Preview

- Developed a career platform enabling students to access internships, CV reviews and AI-powered career guidance
- Implemented intelligent workflows and recommendation systems to simplify career path navigation
- Designed a modern, user-centric interface focused on performance, accessibility and seamless user experience

KinderCare AI – AI-Driven Pediatric Care Platform Preview

- Built a health-tech platform providing AI-based symptom analysis and real-time pediatric guidance
- Developed full-stack architecture using MERN with Next.js for optimized performance and scalability
- Enabled secure communication between parents and healthcare professionals with multilingual support

Emtiyaz Education Platform **Preview**

- Developed the frontend using React, Tailwind CSS and Framer Motion with modular, responsive UI design.
- Integrated APIs for authentication, authorization, course management and AI chatbot communication.
- Collaborated with backend team to implement Desmos integration, Learning Station and Stripe payments.

ECommerce Platform **Preview**

- Built the frontend using React and Tailwind CSS with responsive layouts, dynamic product display and smooth user experience.
- Integrated backend APIs for authentication, cart, checkout and Stripe payments for secure transactions..
